

INSULECT

**Strengthening energy
networks since 1993**

For over twenty years Insulect has been helping companies strengthen their energy networks and improve energy efficiency.

Insulect exists to provide better business outcomes and sustainable value for our customers through a “better informed” approach to asset management.

We do this by enabling better decision making and return on investment through the products, services and support we provide - across electricity networks and for major energy users.

**Better
Informed**

PRODUCTS

NETWORK ASSETS, ELECTRICAL COMPONENTS AND THE TOOLS TO MANAGE THEM FOR LIFE.

SWITCHGEAR

A range of tough, reliable network hardware requiring minimal maintenance for long-lasting performance in substations, overhead and underground applications.

TRANSFORMER CARE

Complete protection for transformers from conventional protection devices to advanced condition monitoring systems and high performance ester fluids.

NETWORKS

Hardware and software solutions that provide meaningful insights into power systems performance, enabling responsive decisions and regulatory compliance.

INDUSTRIAL

Advanced composite materials and custom machined components for greater performance in demanding electrical, thermal and chemical applications.

SERVICES

KEEPING ELECTRICAL NETWORK ASSETS PERFORMING AT THEIR PEAK.

ENGINEERING SERVICES

Our dedicated engineering services team manages all aspects of procurement and specification, through to design, integration and project delivery.

PRODUCT SUPPORT

Our philosophy is to support each and every product we sell for the life of the product and beyond. We do this through our experienced team of application engineers and field service technicians.

TECHNOLOGY COLLABORATION

We work with leading technology partners across the globe to engineer and customise innovative solutions that meet local market conditions.

CUSTOMISED SOLUTIONS

We provide fit-for-purpose solutions through our extensive off-the-shelf range, custom manufactured product and bespoke service packages.

We help simplify and streamline asset management to provide a better grid for all.

Simplification always begins at the end – identifying the operational and business outcomes that are most important and then determining how can they be improved.

We work with customers to strip away layers of complexity, simplify processes and streamline various areas of network management: implementation, usability, maintenance, end of life, and more.
